

MOTO 4T 10w40

Description

Lubricant created to meet the demands of modern 4-stroke engines of motorcycles, high or medium displacement.

Properties

- Multigrade oil, very stable.
- Facilitates cold start by its low viscosity and high lubricity at any temperature.
- High detergent, it minimizes foaming rolling even at high engine speeds.
- Lower fuel consumption, linked to lower friction than conventional lubricants.

Technical data		
Characteristics	Standard	Typical value
SAE Grade		10W40
Density 20°C	ASTM D 4052	0,86
Viscosity 100° C	ASTM D 445	13
Viscosity 40° C	ASTM D 445	90
Viscosity index	ASTM D 2270	150
Flash point open coup	ASTM D 92	215 mín
Pour point °C	ASTM D 97	-33

Quality level

- API SJ CF
- JASO MA, MA2 (T903:2006)

Rev: 160803
